

sevenism

By: Melany Quinones

★ BRIEF HISTORY ★

- Born and raised in the Nottingham, U.K.
- Making music since the mid-90s
- They make ambient and experimental electronic music
- Blends elements of drone, generative composition, and minimalism.

☆WORKS☆

- Released over 530 albums
- Displays his discography on Bandcamp, Soundcloud, YouTube, Spotify, Apple Music, hearthis
- He creates an atmosphere of dark, cinematic, new-age, and lo-fi ambient and AI-assisted music.
- In some of his previous works, he use music coding in his albums called lo-fi arp and recorded dreams.
- He used AI on two of his projects called AI Religion (Hymnal) and Intersep. AI Religion explores the connection of AI and spirituality.
- He participated in the exhibition, “AI: More than Human”, at the Barbican in 2019, presenting the blend of music and artificial intelligence.

- He uses AI tools like NSynth and Suno to make his songs.
- NSynth is a software that creates new instruments and sounds using neural networks and machine learning.
- Suno AI is a software that uses generative artificial intelligence to create realistic music that either has only instrumental elements or combines vocals and instruments.
- He used Suno to get ideas and samples and used them in his albums like “inf etc” and “sora”
